

## Zweave, Inc.

Boston, MA, New York, NY and Washington, DC

Zweave, Inc. is a Design Automation Software company serving the needs of Federal and Consumer Products Development Organizations. Zweave provides software to manage the most complex processes of clothing and equipment design research and design.

### CHALLENGES:

- » Start up company needing instant IT resources
- » Back-office Management
- » Virtual Office with employees geographical dispersed

### SOLUTION:

#### » Premier Managed Desktop with Web Hosting Services

Zweave recognized the value of outsourcing its administrative applications and Beta-Stage web site. Independence IT was contacted to provide back-office application management for accounting, messaging, office productivity and CRM. The Premier Managed Desktop model is one that can leverage the total investment in technology infrastructure. Because of their unique structure including multi-company collaboration and virtual employees geographically dispersed, Independence IT's Premier Managed Desktop service provides an environment allowing stakeholders to interact with the company's data and programs real-time.

"We were looking for a way to provide a seamless solution for our e-commerce site, and benefit from a professional data center's redundancy with the major investment in hardware and software required to perform these tasks. We could not have done it without Independence IT."

— Laura McCann  
President and Co-Founder
